Education

Human-Computer Interaction Engineering Master Degree — ENSIM, France   2022-Ongoing

Relevant Coursework : web development, mobile development, Devops, AI, UI design, VR/AR

Software Engineering Master Degree — ENSA FES, Maroc   2018-Ongoing

Relevant Coursework : Algorithms, Database management, Web/Mobile development, Operating systems
Awards : French Government Excellence Scholarship, Erasmus Scholarship

Projects

Eshopper — Full stack Development

Developed a fully functional e-commerce website using Spring and Angular for a school project, ensuring a seamless user experience.
Demo: youtube.com/watch?v=E_Zr1wbJ7A8

AR Business Card — Augmented Reality

developed an augmented reality business card using Unity and Vuforia for a backpack company, enhancing their marketing strategy and providing customers with an innovative and interactive experience.
Demo: cutt.ly/jwwo3xvn

Droppy bank — Mobile Development

Designed and implemented a blood donation app using Java. The app enables users to find nearby blood donors and schedule appointments for blood donations.
This year I took the initiative to upgrade the source code from Java to Kotlin to enhance the overall efficiency
Demo: cutt.ly/Owwo57MI

Skills/Tools

Programming Languages : JavaScript, Java, Kotlin, C++, C# ,Python
Web/Mobile development : React, Node, Express, Angular, CMS (Webflow/ Wordpress), Spring, React Native, .NET
Database management : Mysql, Postgresql, FireBase, Oracle DB, MongoDB
AR/VR development : Unity, Vuforia, AR foundation
DevOps and cloud services : Jenkins, GIT actions, AWS services, Docker
Data Analysis: Web scraping(Scrapy, Selenium), AI (Pytorch), Talend, Power BI, Hadoop technologies
Other : Git (Github flow),Merise, UML, Figma, Agile
